

Lash Extension Client Guide

This is a how to guide to maximise the results of your lash extensions. After care is critical to achieving the best results and prolonging the life of your lashes.

Lash Facts

The average person has 90-120 natural lashes per eye. Each eye can shed between 2-3 lashes per day.

1 wk = 21 lashes gone

2 wk = 42 lashes gone

3 wk = 63 lashes gone

Lash extensions last between 2-4wks depending on how well you care for them. We recommend lash infills should be done every 2-3 wks to keep your lashes looking full and beautiful.

Before Your Lash Extensions

If you have not had extensions before you may wish to come in for a patch test to ensure you have no reaction to the adhesive used.

Cleanse your lashes before your appointment. Clean lashes means more lash time and longer lasting lashes.

Immediately After Your Extensions

Do Not:

- Get lashes wet for 24hours
- Exercise or do anything that makes you sweat including hot steam or saunas
- Use water based eye makeup remover
To cleanse (after 24hrs), put cleanser on finger blink on and remove with small amount of water
- If using mascare oil free or non-waterproof mascara. If you choose to this may affect how long the lashes last
- Perm your lashes, tint or use lash curlers

Do Not:

Attempt to remove them yourself
his can cause damage to your natural lashes; we strongly advise you to get them removed professionally.

Caring for Your Lashes

A few things to avoid in the weeks after your lash extensions

- Avoid rubbing your eyes or pulling out your lashes
- Use only water based mascara, again this will affect how long they last.
- Comb criss crossing or stray lashes with a mascara wand to brush them back into place

Continuing your eye up look

- Get a touch up in 2 weeks
- Maintain your look with infills every 3 weeks
- Use lash serum to maintain strong, healthy natural lashes; this makes your extensions even more eye enhancing
